

# House Beautiful

OCTOBER 2009

## COLOR ORANGE

Orange doesn't have to look like a Popsicle. Pick a paint from one of these top designers and prepare to be dazzled.

---

"Orange is far more versatile than most people think. You don't have to put it with marabou feathers and 1960s furniture. Try it with a Louis XV carved giltwood console and see how sophisticated and European it looks. This is a Veuve Clicquot orange that we used inside kitchen cabinets, for a bon vivant whose signature pour is Champagne. Coat the paint with beeswax if you want an antique look."
